Professional Summary

Software Engineer with 4 years of experience developing Full Stack applications using Java, Node.js, Next.js, and Angular. Experienced in modernizing enterprise platforms through microservices architectures, SQL-to-NoSQL database migrations, and AWS-based solutions.

Currently contributing to the development of SaaS platforms, third-party integrations, process automation, and AI-powered features for dynamic website generation. Passionate about designing scalable solutions, writing maintainable code, and applying software engineering best practices.

Technical Skills

Backend

Java • Jakarta EE • Hibernate • Node.js • NestJS • Express • PHP • Python

Frontend

Next.js • Angular • Vue.js • React • Tailwind CSS • Bootstrap

Cloud

Amazon Web Services (AWS) • S3 • CloudFront • DynamoDB • SES • Amplify • EventBridge • OpenSearch • Kubernetes • Docker • Terraform

Databases

PostgreSQL • MySQL • DynamoDB

Tools

Git • GitHub • GitLab • Postman • Swagger • Cursor • GitHub Copilot • ChatGPT

Professional Experience

Creztu S.A.S

Cartagena, Colombia

Full Stack Software Engineer

December 2024 – Present

- Implemented AI-powered features for automated website generation using Craft.js as a visual page builder.
- Designed the architecture for website storage and publishing using Amazon S3, CloudFront, and DynamoDB.
- Developed Full Stack applications using Next.js, Vue.js, NestJS, and Express.
- Contributed to the migration of critical authentication services from Java to NestJS, improving system maintainability and scalability.
- Designed and implemented RESTful APIs for SaaS platforms focused on e-commerce solutions.
- Integrated third-party services, including Alegra, to support administrative and billing processes.
- Developed and integrated payment gateway solutions using Wompi, ePayco, and Stripe.
- Worked with Amazon SES, AWS Amplify, OpenSearch, and Kubernetes to support application deployment and operations.
- Leveraged AI-assisted development tools such as Cursor, GitHub Copilot, and ChatGPT to accelerate development, refactoring, and code generation.
- Actively contributed to technical design discussions and the evolution of new platform features in collaboration with the development team.

WYER

Cartagena, Colombia

Full Stack Software Engineer

Julio 2022 – Noviembre 2024

- Contributed to the migration of a monolithic application to a micro-frontend architecture using Angular 14 and Angular Material.
- Developed backend services in Java using Jakarta EE, Hibernate, and Apache Tomcat.
- Implemented RESTful APIs for multiple system modules.
- Contributed to the migration of data from PostgreSQL to Amazon DynamoDB.
- Developed scheduled jobs using Quartz Scheduler.
- Implemented event-driven processes using Amazon EventBridge.
- Developed scripts for large-scale data correction and migration tasks.
- Contributed to the development of the billing, subscriptions, and payment processing system using Stripe.
- Collaborated with cross-functional teams following Agile methodologies.

Education

Fundación Universitaria Colombo Internacional	Cartagena, Colombia • 2019 – 2024
Bachelor's Degree in Systems Engineering	
Professional Engineering License (COPNIA)	Cartagena, Colombia • Issued: May 2026

Languages

-  Spanish - Native
-  English - B1 (Intermediate)

Featured Projects

AI-Powered Website Builder
Implemented AI-powered features for automated website generation using Craft.js and AWS.

Cloud Infrastructure Architecture
Designed a cloud infrastructure using Amazon CloudFront, Amazon S3, and DynamoDB for scalable website storage and deployment.

Enterprise REST APIs
Developed RESTful APIs using Java, NestJS, and Express for SaaS platforms and billing integrations.
